[See What Our Customers Are Saying!](#)

We used Auctioneer Software for a multi-par auction for the first time in October and we could not be more pleased with how the program worked to run our auction as well as the interaction and help we received from the staff of Auctioneer Software. From the start of setting up the auction to the day the auction closed everything ran smoothly and we came across no issues on our end or had any issues from bidders who registered and took part in the auction. The staff at Auctioneer Software were always quick to respond to any questions we had while setting up our auction and throughout the run time of the auction. They were always available to assist us and followed up upon the closing of our auction to ensure everything ran smoothly. We would certainly recommend Auctioneer Software to anyone looking for an online platform especially for a multiple par auction, we look forward to using it again!
