100% Commission-Free Auction Software

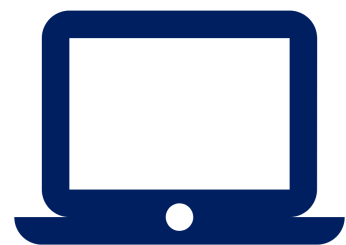

Pricing for our auction software is pretty simple: pay a one-time setup fee and for monthly hosting. That's it! Our software is commission-free because we believe that the profits from your auction belong to you. Many third-party providers want a cut of your sales after each auction, but Auctioneer Software doesn't do that. You put in all the work to make sure that your auctions are successful, so you should get to keep all of the profits. We do things differently around here - making sure to put the auctioneer first.

**Reliable
Customer Service**

**100%

Customer Service You Can Count On

We know that if you need help during an auction, you need it right then and there. You can't afford to wait around for someone to call you back. That's why we are always ready to help. Our staff of developers are here for whatever you need, whenever you need it. Plus, when you call us you will always reach a real person right away. No automated response systems here!

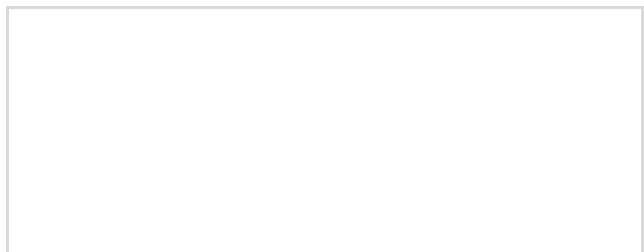

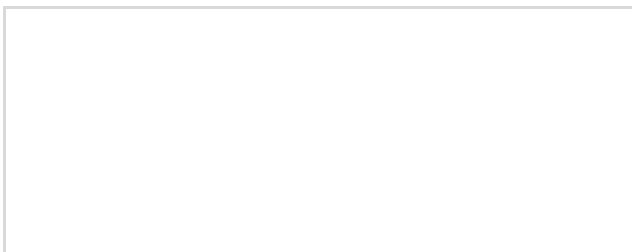

"I just wanted to say thank you for picking up the telephone and helping us work through problems when we need immediate assistance."

How To Navigate Google's Privacy Changes

User privacy has been a hot topic the past few years. Particularly since the Cambridge Analytica Scandal, users have been thinking a lot more about where their data is going. After all, people enter emails, birthdays, credit card information, and geographical location when shopping online, interacting on social media, or even just performing a general search. While users give this information freely, they want to make sure that their data is safe and isn't being treated incorrectly. Google is starting to roll out more features that focus on protecting user privacy. The biggest one? Phasing out third-party cookies.

3 Ways We Keep Your Data Safe

In a data and online driven world, it can be concerning when we put so much of our personal information out on the web. After all, how do we know that our data is being respected and kept safe? How do we know that information is not being sold for some other businesses profit? These might be just a few of the questions that you have had when thinking about the data and information that you put out on the web – and rightfully so! It seems that many companies and businesses don't address data and what steps they are taking to keep your safe, so that's exactly what we want to do.
